

Cache-Hit measurements

Cache Hit measurement plot taken on Jasraj Singh's Ubuntu 16.04 VM. Please note that all measurements that were greater than 1000 were deleted.

Cache Miss measurements

Cache Miss measurement plot taken on Jasraj Singh's Ubuntu 16.04 VM. Please note that all measurements that were greater than 1000 were deleted.

Findings

- Cache-Hit measurements are centered around 300-400 range, and there is a less amount of points outside the range as compared to Cache-miss measurements
- Next steps will be to run the same set of code on the old machine and try to duplicate the results.
